Business-developing graduate with an ambition to become CEO

Panda Health is a potential LEAD company with a business concept based on facilitating equally healthcare providers and healthcare receivers in both communication and diagnosis, before and during the care phase. The company is in the forefront of admission to LEAD, but the team needs to be strengthened to take the final step into an admission.

Panda Health is looking for a sales-oriented graduate within business development and corporate strategic areas, with an ambition and drive to build an e-health business. We are looking for you, who in the long term, are interested in taking over the role of CEO.

You

You need to keep a close eye on the digital technology we are working on meanwhile learning the health model once in place. We want you to help us build the prerequisites of the pilot being conducted. A work that takes place with founder Mats Erlandsson and Visiarc AB, developing the functionality.

We are looking for someone who can build the business case around Panda and start a cash flow into the company, identify business models and develop them.
We highly value your analytical skills!

We

We are a small company that has come a bit on our way. We are located in Linköping, but our product lives in other regions as well.

As a startup, it is extra important to us that it is the right person who joins our team and enters the company with the right expectations. You need to be prepared to accept "contractual terms", which means a moderate compensation initially supplemented by shares in the company. The intention is that this will be a really good deal for both of us!

Application

Submit your application to matchning@lead.se with a link to your LinkedIn profile or CV and motivation for why we should meet you. We want your application by 31 July 2017
